

Marketing Funnel & Conversion Analysis

1. Project Description

This project analyzes a marketing funnel (Visitors → Leads → Customers) to understand user behavior, conversion efficiency, and business growth opportunities.

2. Objectives

- Analyze funnel stages
- Calculate conversion rates
- Identify drop-offs
- Provide recommendations

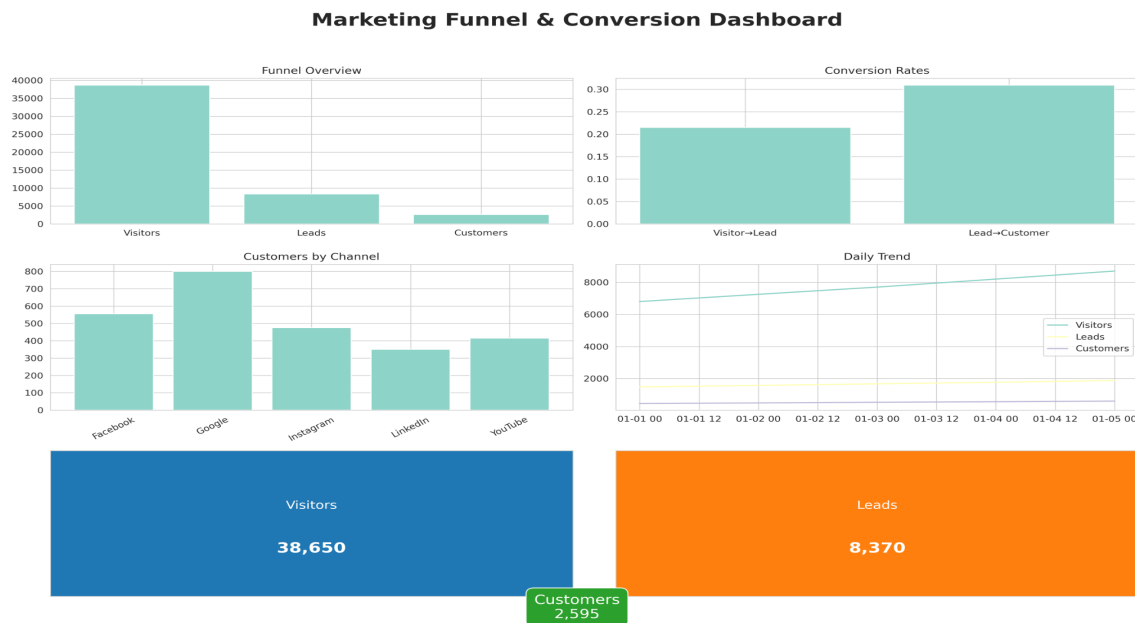

3. Tools Used

Python, Pandas, Matplotlib, Seaborn, Google Colab

4. Colab Link

<https://colab.research.google.com/drive/1YovV7udFkcQgh6HHxvcVT2cjrGXnh5P0?usp=sharing>

5. Dashboard

6. Insights

- High drop from Visitors to Leads
- Lead to Customer conversion is better
- Google performs best
- Positive growth trend

7. Recommendations

- Improve landing pages
- Focus on high-performing channels
- Enhance lead nurturing
- Retarget users

8. Conclusion

The project demonstrates how data-driven decisions can improve marketing performance and conversions.
